

# ASHKAN ARABI

(915) 888 - 9801 • aarabimian@miners.utep.edu • linkedin.com/in/ashkan-arabi • github.com/AshkanArabim

## EDUCATION

### Bachelor of Science in Computer Science, Mathematics Minor

University of Texas at El Paso, El Paso, TX

Graduating May 2026

GPA: 3.94

Major GPA: 4.00

Relevant coursework: Object-Oriented Programming, Data Structures & Algorithms, Discrete Math, Matrix Algebra

Honors & Activities: Dean's List since Fall '22, Houston Endowment Scholarship Recipient

## SKILLS

**Programming / Markup Languages:** Python, Vala, HTML/CSS, C++, JavaScript, Java, C, LaTeX, Bash

**Frameworks & Software:** Linux, git, GTK, NumPy, Pandas, PyTorch, TensorFlow, React.JS, Conda, Microsoft Office

**Certifications:** Coursera Deep Learning Specialization - October 2023

## EXPERIENCE

### Upcoming Information Technology Intern: Texas Instruments, Dallas, TX

Summer 2024

### Undergraduate Research Assistant: UTEP, El Paso, TX

January 2024 - present

- Contribute to the creation of speech-anomaly detection system by using generative AI to synthesize training datasets.
- Used **PyTorch** to reconstruct state-of-the-art networks proposed in papers.

### Open-Source Contributor: GNOME Foundation, Remote

December 2023 - present

- Fixed bug causing GNOME Clocks timers to not progress during system suspend by reworking the timer logic.
- Added functionality to world clock to show country and state in case two cities have the same name.

### Student Coordinator: AI4ALL, Remote

August 2023 - December 2023

- Mentored 16 students across 4 project groups in AI4ALL's Apply AI program.
- Helped students understand AI/ML concepts such as loss, backpropagation, CNNs, RNNs, transfer learning, etc.

### Undergraduate Researcher: Temple University, Philadelphia, PA

June - July 2023

- Conducted **original research**  presented at ACM MOBIHOC about using Wi-Fi CSI for hand gesture recognition on smartphones.
- Developed CNN architecture to classify 5 gestures from 4 people in 6 scenarios using **Keras**.
- Obtained >90% classification accuracy by using techniques such as LR Scheduling.

## PROJECTS

### Hacktoberfest 2023

October 2023

- Contributed to three open-source repositories through bug-fixes and translations.
- Fixed subtitle cutoff bug in ASCII video player written in **C**. 

### Advent of Code 2022 - Annual Programming Challenge

August 2023

- Coded **C++** solutions to 12 of 25 challenge questions using backtracking, and graph traversal algorithms.
- Used classes, queues, vectors, and streams to efficiently calculate results based on given inputs.

### To Do List Web App

Fall 2022

- Developed interactive to-do list web app with local save function through vanilla **HTML, CSS & JS**.
- Used Chrome's local storage API for saving user data.
- Followed typical **git/GitHub** version control workflow during implementation.

## LEADERSHIP

### President & Founder - Free and Open-Source Software Club at UTEP

December 2023 - Present

- Encouraged participation in open-source projects through workshops, info sessions, competitions, and social events.

### Treasurer - Association for Computing Machinery at UTEP

August 2022 - January 2024

- Planned and executed the Sun City Hackathon; a three-day competition attended by **more than 20 students** to develop novel AI-powered apps.
