EDUCATION

Bachelor of Science in Computer Science, Mathematics Minor

University of Texas at El Paso, El Paso, TX

Graduating 05/26

GPA: 3.94

Major GPA: 4.00

Relevant coursework: Machine Learning, Object-Oriented Programming, Data Structures & Algorithms, Discrete Math

Honors & Activities: Dean's List since Fall '22, Houston Endowment Scholarship Recipient

SKILLS

Programming / Markup Languages: Python, Vala, HTML/CSS, JavaScript, Java, Bash, Haskell, PHP, LaTeX, C

Frameworks & Software: Linux, git, GTK, NumPy, Pandas, PyTorch, TensorFlow, React.JS, Conda, Docker

Certifications: Coursera Deep Learning Specialization - October 2023

EXPERIENCE

Upcoming Information Technology Intern: Texas Instruments, Dallas, TX

May - August 2024

Undergraduate Research Assistant: UTEP, El Paso, TX

January 2024 - present

- Contribute to creation of Autistic vs neurotypical speech classifier by testing ways to synthesize train data.
- Developed an **accent-changer model**  able to convert foreign English accents to native using **HuggingFace** pretrained models.
- Implemented a **neural style-transfer model**  in **PyTorch** to learn PyTorch & explore usage for accent-changing.

Open-Source Contributor: GNOME Foundation, Remote

December 2023 - present

- Modernized GNOME Clocks' UI to add features such as full-screen timers and timer editing. (in progress)
- Fixed GNOME Clocks timers not progressing during system suspend by revising timer logic. (merged)
- Added functionality to world clock to show country and state in case two cities have the same name. (open)

Student Coordinator: AI4ALL, Remote

August - December 2023

- Mentored 16 students across 4 project groups in AI4ALL's Apply AI program.
- Helped students understand AI/ML concepts such as loss, backpropagation, CNNs, RNNs, transfer learning, etc.

Volunteer Researcher: UTEP, El Paso, TX

August - October 2023

- Contributed to the development of software for training users' weaknesses in spotting Phishing emails.
- Classified emails across 7 phishing attributes with 78% accuracy by developing multi-output NLP classification model.
- Preprocessed and visualized more than 5 datasets using **Pandas** and **NLTK** to use as training material for model.

Undergraduate Researcher: Temple University, Philadelphia, PA

June - July 2023

- Published **paper**  presented at ACM MobiHoc about using Wi-Fi CSI for hand gesture recognition on smartphones.
- Developed CNN architecture to classify 5 gestures from 4 people in 6 scenarios using **Keras**.
- Obtained >90% classification accuracy by using techniques such as LR Scheduling.

PROJECTS

Hacktoberfest 2023

October 2023

- Contributed to three open-source repositories through bug-fixes and translations.
- Fixed subtitle cutoff bug in ASCII video player written in **C** by debugging the subtitle buffer. 

Advent of Code 2022 - Annual Programming Challenge

August 2023

- Coded **C++** solutions to 12 of 25 challenge questions using backtracking, and graph traversal algorithms, and more.
- Used classes, queues, vectors, and streams to efficiently calculate results based on given inputs.

LEADERSHIP

President & Founder - Free and Open-Source Software Club at UTEP

December 2023 - Present

- Recruited team of 6 officers to host weekly workshops on git, Linux, Vim, open-source contributing, and more.
- Hosted UTEP's **first open-source hackathon**, OpenHack, to help students make their first contributions.
